Agenda

Introduction

Updates: The state of Olympic

DApp Spotlight: Augur

ethereum Olympic

Lots of stress testing

There were some forks in june

But mostly stable now (<20tx/s, at 8s block time)

Mining reward reduced to 0.05 ether / block

Blockchain enormous due to storage stress tests

10 GB Blockchain

30 GB of computed states (only 10 GB in cpp-eth)

Early version for state tree pruning in pyethereum

ethereum Frontier

Only 1 more blocking bug (performance issue)

In the meantime, weekly 0.9.* releases
But Frontier might be announced before 0.9.36

Default gasPrice will be set to 1 wei at Frontier

ethereum Finance

Lots of complains regarding in-transparency of foundations financial situation

9m$ lost through bitcoin price
Probably around 4m$ left
High salaries

After Frontier foundation will have funds through ether

Prediction market for frontier launch on fairlay

ethereum

Mist

Old version deleted

Will be completely redone in js

Separate repository

Early prototype

ethereum DEVCON-1

First conference for DApp developers

Teaser video

- but doesn't say anything
- hinted at London as location
