

3rd Ethereum Meetup

<PLACEHODLER/>

- Keeps track of account balances
- Received ether added to balance of sender
- 3 commands:
 - **send** *<vol>* *<recv>*: transfer *<vol>* wei from sender balance to balance of *<recv>*
 - **withdraw** *<vol>* *<recv>*: subtract *<vol>* wei from sender balance and send *<vol>* wei from contract to *<recv>*
 - **deposit** (no command): don't attempt to send or withdraw

Etherscripter

- <http://etherscripter.com>
- UI-Based
- Generates Ill-code
- Only compatible with POC4
- But only 2 adjustments in Ill-code necessary:
 - CALL arguments
 - init

AlethZero

- Ethereum C++ GUI Client
- Compiles Ill-code to evm
- Preview mode for testing (no mining required)
- Browser window with special js object

HTML/Javascript-Contract-UI

- Ethereum provides global eth object
- Access contract storage
- Callbacks for changes in storage
- Callback for new blocks
- List of keys in the client
