

# 7<sup>th</sup> Ethereum Meetup

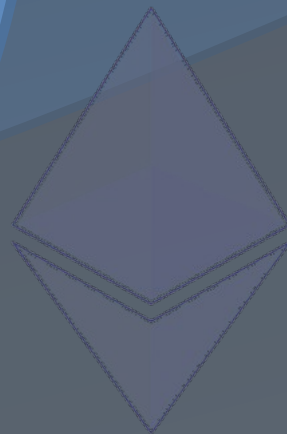

# DEVcon 0

- Internal conference for developers
- 13 talks uploaded
- Talks about whisper, swarm, libp2p
- <https://youtube.com/user/ethereumproject>

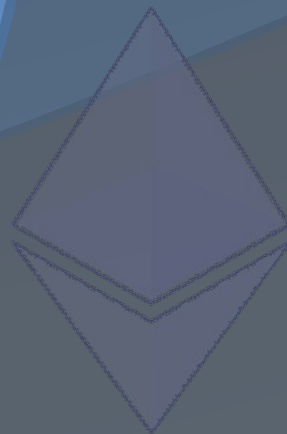

# ethereum.js

- Big refactoring in the js-api
  - web3.eth: allows local execution of contract functions
  - web3.shh: access to whisper
  - web3.db: local storage
- Can use json-rpc as backend (runs in normal browser)

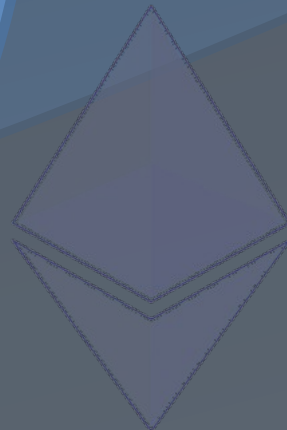

# Solidity

- Now considered main language
- Serpent(2) no longer official supported
- Uses and auto-generates contract abi
- Now considered feature complete for release
- Documentation still a bit lacking

# Light Client

- Won't be ready for genesis release
- Event / Logs
  - Bloom Filter for every transaction
  - Bloom Filter for every block

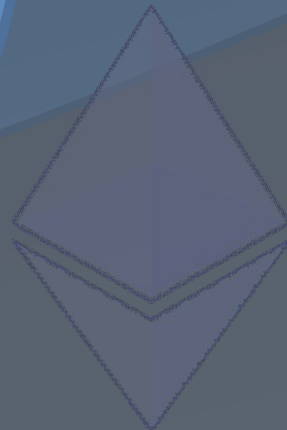

# Genesis Release

- Audit in progress
- Release Date: March 20<sup>th</sup>, if audit passes
- Bounty program in progress
  - 1 critical bug found
  - Private key was reconstructible

- Demo
  - Create campaign
  - Fund campaign
